

Dreamview

Technical Data

Dreamview is a unique high strength PVC coated polyester mesh fabric. One side is coated white and the other side coated black. For printed façade applications the white face is designed for inkjet printing. The black face is towards the interior of the building and allows excellent views from inside to give a one-way vision effect.

Dreamview has excellent dimensional stability and very high UV resistance.

Base Fabric	Polyester
Coating	PVC
Weight (g/m²)	570
Tensile Strength (N/50mm)	3120 x 2990
Tear Strength (N)	500 x 475
Shade Factor (approx. %)	70
Fungal Resistance	Treated
Fire Retardant	Yes
UV Warranty*	5 year pro rata
Roll Size (m)	1.87 x 50
Colour	Black/White

The above results are typical averages taken from quality assurance testing. Product technical data are subject to change without notice. *for further details see separate warranty statement.
